

Project User Manual

1. Load the Projects

Unzip the file 'xiongycasg3client' , 'xiongycasg3EJB' , ' xiongycasg3RemoteLib' , 'xiongycdblib.rar' and load them in Netbeans.

2. Add Required Libraries

'xiongycdblib' Project: Please add the 'sqljdbc4.jar' to its 'Libraries' folder.

'xiongycasg3EJB' Project: Please add the 'xiongycasg3RemoteLib.jar' from 'xiongycasg3RemoteLib>>dist' and 'xiongycdblib.jar' from 'xiongycdblib>>dist' to its 'Libraries' folder.

'xiongycasg3client' Project: Please add the 'appserv-rt.jar' and 'xiongycasg3RemoteLib.jar' from 'xiongycasg3RemoteLib >>dist' to its 'Libraries' folder.

Besides, you need to copy the 'sqljdbc4.jar' to 'glassfish>>lib' folder.

3. Start the Server and Deploy the EJB Project

Start 'Services>>Servers>>Glassfish 4.0'. Once you see this line 'Loading application xiongycasg3EJB done' showed in the 'Glassfish 4.0' console. Then you can run the 'xiongasg3client' project.

4. Test the Project

Using the sample I/O file and follow the instructions there to test the project.
